General feedback (5 points):

As someone who has some general knowledge about sickle cell anemia, I think this was highly informative paper because it added a layer of depth to a general understanding of the disease. I really like how this paper focuses on the treatment aspect of sickle cell anemia and brings the reader's attention to the progress being made in that regard instead of restating general knowledge. Speaking from the standpoint of a general audience, I think that there is some terminology that can be better explained and there are a few small grammar mistakes but other than that I really enjoyed reading this paper.

Overall assessment (excellent, good, needs improvement): Excellent
