

Scientific Communication Writing Assignment Rubric – Peer Evaluation

your name: Baylor Freeman

assignment reviewed: Paper 117 – Shenglin Xu (Serena)

Using the rubric below, please evaluate each of your assigned news articles in each of the areas shown, filling out a separate evaluation form for each news article. Please highlight the part of the rubric text that explains why you chose a specific assessment category. In the “General Feedback” section at the bottom of this form, please include more specific feedback, including things that you liked as well as things that you feel could be improved upon and suggestions on how to improve them.

	Excellent	Good	Needs Improvement
Content: Does the news article convey the writer’s understanding of a biological topic?	The news article introduces a biological topic and clearly illustrates the writer’s understanding of the topic including what is known and not known about it and how understanding the biology associated with the topic helps us understand larger issues or concepts.	The news article introduces a biological topic and presents information about it, but the topic is not explained clearly or doesn’t distinguish between what is known vs. what is not known or doesn’t explain how understanding the biology associated with the topic helps us understand larger issues or concepts.	The news article does not illustrate the writers understanding of the topic and does not indicate what is known vs. what is not known or how understanding the biology associated with the topic helps us understand larger issues or concepts.
Audience: Is the writing appropriate for the target audience?	The news article avoids jargon and clearly defines terms and ideas for a non-expert audience.	The news article defines or explains some terms, but some key terms or ideas would be challenging for a non-expert audience.	The news article lacks definitions and explanations, making the topic inaccessible to a non-expert audience.
Organization: Is the news article clearly organized?	The news article is well organized and easy to follow with good transitions between the paragraphs.	The news article is generally organized and easy to follow but conceptual connections aren’t always clear.	The news article is disorganized, and the information presented doesn’t flow well.

	Excellent	Good	Needs Improvement
Format, spelling & grammar: Does the news article follow the recommended format and is it free of writing errors?	The news article follows guidelines for paper length and format and has been carefully proofread for spelling and grammatical mistakes.	The news article is outside the recommended length or does not conform to the formatting guidelines; the news article contains a small number of spelling and/or grammatical errors.	The news article is significantly outside the recommended length and does not conform to the formatting guidelines; the news article contains numerous spelling and/or grammatical errors.
Citations: Are the citations presented appropriately?	The news article contains appropriate in-text citations and a list of references for all source material.	The news article is missing either appropriate in-text citations or a list of references.	The news article is missing appropriate in-text citations and a list of references OR citations are missing for one or more sources.
Rationale for choosing topic: Did the writer indicate why they chose the topic?	The rationale for choosing the topic is clearly explained.		No rationale for the topic's choice is provided.

General feedback (5 points):

- I really appreciated the long-form analogy you used in paragraph four to describe the PRDX5 gene, and its function. It was a fun interesting and easy to digest way of explaining how the gene might perform within the body of someone with alopecia areata.
- I also appreciated that your introduction paragraph was very straightforward, and you were able to identify for the reader the exact formatting of your essay. This can be very helpful when people need to reference your information in the future.
- While it is important to understand the function of all the genes you discussed in the paper, you didn't mention the gene that is currently being tested to treat alopecia areata patients, CTLA4 proteins, until the final paragraph. I think that if you were to talk about this gene in another paragraph, it would shed some insight as to why the treatment method could prove to be too simple and ineffective. Does this CTLA4 protein have a similar effect to one of the other genes that you mention earlier in the text? Maybe it can replace one of those paragraphs to help you reduce your page numbers.

Overall assessment (excellent, good, needs improvement): Excellent
