**General feedback (5 points):**

- Half of the paper is made up of direct quotes. Remember to put all thoughts into your own words.

- The paper contains a lot of interesting facts about pancreatic cancer. It's clear that the authors know a lot about this topic. However, it reads like a long list of facts, and does not elaborate on anything else. Why is this information interesting? What do the authors think about the topic?
- In comparison to the information about pancreatic cancer, there is very little information about the experiment itself.
- The paper is a single one-page-long paragraph. This is below the 2-page requirement, and the single paragraph makes it hard for the information to flow. Breaking up the information can help readers follow the paper better, and allow for more elaboration and flavorful detail.
- Around halfway through the paper, the font suddenly changes.

**Overall assessment (excellent, good, needs improvement):**

Has the foundations for a good article, but needs improvement.
