General feedback (5 points): 4.5

I would ask Dr. Davis, a T.A., or a writing tutor first, since they are more experienced with this, but I personally think it could be worthwhile explaining how trees are significant in sustaining life on Earth (in your second paragraph). Briefly, with two sentences at most.

→ nevermind! you did this later on at the top of the second page...it might add to the flow of your writing to switch up the structure and put this part a little earlier for context

Maybe define monoculture with a hyphen (I'm not sure if this is grammatically correct). Ex: "Modernly, there has been a spike in the abundance of young forests and monocultures - *simple definition*..."

I love the final paragraph, especially where you say "these trees embody the truth that we can reverse what has been done to our environment". You are realistic in showing the gravity of climate change while also ending on an uplifting note to encourage readers with the hope that change is possible. I think this is really impactful when writing about climate change.

Overall assessment (excellent, good, needs improvement):

I enjoyed reading this article! It's a very interesting subject written in a way that is easy to understand. I had no idea that older trees could release stored carbon dioxide when cut down. You found a great topic to write about!
