General feedback (5 points):

- Sentence structure is difficult to interpret, especially the first few sentences.
- Try to avoid using the passive voice so much. For example, say “In 2012, Orphal Colleye and his colleagues from the University of Liege in Belgium published clownfish research in... journal instead of “clownfish research conducted by....”
- Define scientific terms—what is a clade
- “Evidence also present” = awk, maybe “there was more evidence present for wider variety of species of fish...”

Overall assessment (excellent, good, needs improvement):

The information is there, I think just working on making it flow a little better would be helpful to readers. Adding some transitional phrases and rewording some sentences would help with that. I did like really like the topic though and found it an interesting read.
