General feedback (5 points): 4.25

This was a great paper. You did a nice job explaining the topic and defining the biological terms, making it more accessible for a general audience. I really liked your topic choice of how chronic stress is linked to immune system aging, it was very interesting to read. One thing to work on a little bit is watching for run on sentences. I think if you split up some of the run on sentences the paper will flow much better. Also, be careful with some repetitive language. "long been" was used a few times in the first paragraph. There is clearly a great understanding of the topic, just some little things needs to be fixed in order for the paper to flow better!

Overall assessment (excellent, good, needs improvement):

This paper is good, almost at excellent! Just fix some of those longer sentences to make things a little more clear!
