### General feedback (5 points):

I thought that your paper was nicely structured and easy to read. There were a couple of questions that I think might be important to include in your third and fourth paragraphs:

- What is the cause and effect of inflammation on the brain? Why is it positive, that inflammation is decreased using mindfulness practices?
- What is the prefrontal cortex of the brain? And what behaviors is it known to control?

It might be beneficial to express more of the dissenting opinion in the beginning of your article but seeing as that might make you go over the page limit– I would say that change is non-essential.

I liked the way you phrased your conclusion paragraph, comparing mental health to overall physical fitness. Especially in the format of a news article, I think that it's important to make comparisons between topics that are well known by the public and topics that might not be as well known.

**Overall assessment (excellent, good, needs improvement):** Excellent
