General feedback (5 points):

The new article portrays a clear understanding of the topic but does not explain in detail how the transition from meat to insects would benefit the ecosystem when it comes to the area of waste and ammonia production. The article draft also went a little over the specified article length of 2 pages, but that can be fixed with the elimination of jargon. When it comes to organization, if the paragraphs are clearer when it comes to their topic sentence, the fluidity of the paper would greatly increase.

Overall assessment (excellent, good, needs improvement):

This is a very interesting topic to learn about, but it needs improvement when it comes to the organization of the Paragraphs so it can create a more fluid paper. This is a good paper, it only needs better organization and to keep it within the required paper length.
