

Scientific Communication Writing Assignment Rubric – Peer Evaluation

your name: Sonia Kulasooriya

assignment reviewed: #95 (Eunjeong Shi)

Using the rubric below, please evaluate each of your assigned news articles in each of the areas shown, filling out a separate evaluation form for each news article. Please highlight the part of the rubric text that explains why you chose a specific assessment category. In the “General Feedback” section at the bottom of this form, please include more specific feedback, including things that you liked as well as things that you feel could be improved upon and suggestions on how to improve them.

	Excellent	Good	Needs Improvement
Content: Does the news article convey the writer’s understanding of a biological topic?	The news article introduces a biological topic and clearly illustrates the writer’s understanding of the topic including what is known and not known about it and how understanding the biology associated with the topic helps us understand larger issues or concepts.	The news article introduces a biological topic and presents information about it, but the topic is not explained clearly or doesn’t distinguish between what is known vs. what is not known or doesn’t explain how understanding the biology associated with the topic helps us understand larger issues or concepts.	The news article does not illustrate the writers understanding of the topic and does not indicate what is known vs. what is not known or how understanding the biology associated with the topic helps us understand larger issues or concepts.
Audience: Is the writing appropriate for the target audience?	The news article avoids jargon and clearly defines terms and ideas for a non-expert audience.	The news article defines or explains some terms, but some key terms or ideas would be challenging for a non-expert audience.	The news article lacks definitions and explanations, making the topic inaccessible to a non-expert audience.
Organization: Is the news article clearly organized?	The news article is well organized and easy to follow with good transitions between the paragraphs.	The news article is generally organized and easy to follow but conceptual connections aren’t always clear.	The news article is disorganized, and the information presented doesn’t flow well.

	Excellent	Good	Needs Improvement
Format, spelling & grammar: Does the news article follow the recommended format and is it free of writing errors?	The news article follows guidelines for paper length and format and has been carefully proofread for spelling and grammatical mistakes.	The news article is outside the recommended length or does not conform to the formatting guidelines; the news article contains a small number of spelling and/or grammatical errors.	The news article is significantly outside the recommended length and does not conform to the formatting guidelines; the news article contains numerous spelling and/or grammatical errors.

Citations: Are the citations presented appropriately?	The news article contains appropriate in-text citations and a list of references for all source material.	The news article is missing either appropriate in-text citations or a list of references.	The news article is missing appropriate in-text citations and a list of references OR citations are missing for one or more sources.
Rationale for choosing topic: Did the writer indicate why they chose the topic?	The rationale for choosing the topic is clearly explained.		No rationale for the topic's choice is provided.

General feedback (5 points): 4

I think there are some minor grammar punctuation errors that could be reviewed with a writing tutor, but they are very small and don't hinder what the article conveys. The writing center is super helpful and has caught a lot of mistakes in my writing that I didn't see before.

This topic is very interesting but also quite challenging, especially for readers without a biology or science background. I think Dr. Davis could be a great resource since she specializes in genetics, and could help give some tips on how to make this subject easier to understand. There are a lot of terms that can be challenging (CRISPR-Cas9, enzyme, AVP, Avrplasm, etc.). I would identify which are absolutely necessary to the article and which you can leave out or simplify, so that it is less confusing and overwhelming for a reader without that science background

The structure overall is good; I think a more reflective conclusion to wrap it up would be helpful, though. Again, I recommend the writing center, from personal experience, it has been the most helpful with creating structure and improving the organization of my writing.

Overall assessment (excellent, good, needs improvement)

I love this topic! It is really interesting and clearly very specific. It looks to be very challenging to write about, since it is a more complicated subject that is difficult to simplify, but I think you can do it. You already have a very solid, well-written draft. I'm sure the final draft will turn out amazing. Thank you for sharing it with me!
