

THE PEER TUTORING PROGRAM & YOU

What is Peer Tutoring? Is it for me?

What do Peer Tutors Do?

Peer tutors meet individually with students to support them in mastering basic concepts in the classes they tutor for! While they cannot help with assignments that are going to be graded, they're more than happy to work through relevant concepts and help you build strong study habits, time management skills, and other helpful academic tools.

Who are the Peer Tutors?

Peer tutors are your fellow students who have taken the course they tutor and were recommended by faculty to the program!

What are Tutoring Sessions like?

Your peer tutor will reach out via email to confirm meeting details and content that you want to review. You can work out practice problems, review formulas, look over past assignments, or even brainstorm study strategies! Then, you'll get an email summary with helpful advice and notes from your tutor.
